The steel structure production facility is certified according to standards EN: 1090-1:2009+A1:2011, and the welded load-bearing steel structure elements meet the EXC4 class.

ABOUT COMPANY

Engineering Construction Company **LTD.** "TILTS" Founded in **1989**, it is one of the largest and most significant construction companies in Latvia.

Its main activities are related to the construction of bridges and tunnels, the production of metal structures and concrete products, providing a full service cycle for engineering structures of various complexity levels.

LEAN THINKING

ENVIRONMENTALLY FRIENDLY

Environmental protection is a priority for the company. Our knowledge and experience are used for the continuous improvement of technological processes and resource efficiency to reduce the harmful impact on the environment and ensure production processes comply with legislative requirements. We implement all necessary procedures to guarantee this. This principle must take precedence over all commercial benefits.
