

VALMIERAS STIKLA ŠĶIEDRA, AS

VALMIERAS STIKLA ŠĶIEDRA, AS specializes in manufacturing glass fibre and its products, offering varying levels of temperature resistance: E-glass (up to 600°C), HR-glass (up to 800°C), and high-content SiO₂-glass (over 1000°C). The company operates a vertically integrated production process encompassing all stages of glass fibre manufacturing, from yarn production to weaving and finished products with various coatings and laminations.

These products are primarily used in mechanical engineering, including the electric vehicle industry, as well as in fire safety, aviation, shipping, oil refining, construction, architecture, and other sectors.

VALMIERAS STIKLA ŠĶIEDRA, AS operates production facilities in Latvia and the United Kingdom.

PRODUCT FEATURES:

- ◆ Incombustibility
- ◆ Chemical resistance
- ◆ High tensile and extruded strength
- ◆ Sound insulation
- ◆ Electric insulation
- ◆ Thermal insulation
- ◆ Insensitive to UV radiation
- ◆ Water non-observant
- ◆ Biological and rot-resistant
- ◆ High vibration resistance
